Stockbridge, GA 30281  
Title: picture/poster pals

## CLAIMS

I claim:

1. An adjustable device for framing pictures, posters, notices or any other paper 2 dimensional presentation piece.
2. The device can easily be trimmed to fit the presentation piece while still maintaining the original precision die-cut mitered corners.
3. The device of Claim 1 is adjustable because the molding strips are easily cut to fit a specific presentation piece.
4. The device of Claim 2 and 3 because the cuts to fit are made in the middle of the molding strips and those cuts are concealed by the four additional shapes in the set.
